

MH CO LASER MARKING MACHINE

1. Industrial touch screen system, easy to operate
2. Full aluminum structure, strong and steady
3. Permanent marking, no ink consumables, economic & environment
4. High efficient, steady & reliable
5. Applicable for various of industries

This CO series fly CO2 laser marker is widely applied in all kinds of industries such as food, beverage, cosmetic, pharmacy, furniture, electronic, pipes etc., for placing messages which include date, batch, expiry, 2d code, barcode, series number, logo, text etc. This series CO2 laser marker is flexible and suitable for various of material such as

Plastic (PET BOTTLE, Plastic bag, PVC pipes etc.), leather, glass, paper, wood, some metal product which surface is coating etc., and other non-metallic product, which is an ideal traceability system for industries.

SPECIFICATION

Description	Laser Marking machine
Model	MH CO-30
Laser source power	30W
Laser source model	CRD (CHENGRUIDA)
Laser wavelength	10.6um
Lens field	110*110mm
Laser source type	CO2 metal RF tube source
Lens focal length	F=160mm
Power supply	220-250V, 50-60HZ , 600W
Power supply brand	Taiwan Meanwell
Galvo head	ZBTK Double red focus
Marking speed	Depends on the actual production line
Marking materials	Transparent PVC , PET bottles , wood , plastic film, coated metal , PVC pipes , paper box , glass bottle , paper label
Focal length focus	Double red focus
Machin system	10.2inch, one touch screen
Operation language	English , Vietnamese , Chinese
Machine size	80*69*147cm
Machine net weight	55KG
