

MH UV LASER MARKING MACHINE

1. All in one design, easy to install
2. Industrial touch screen system, easy to operate
3. Full aluminum structure, strong and steady
4. Permanent marking, no ink consumables, economic& environment
5. High efficient, steady &reliable
- 6 Applicable for various of industries

FEATURES

Minghong UV Laser Printers, adopting wavelength

355nm, which can produce fine beam, making excellent marking performance, it is highly suitable for plastic material such as PE , HDPE ,PET ,PP ,PVC , ABS etc.,plastic film other plastic, as well as suitable for glass, acrylic , metal which surface with painting etc.,

other more materials, widely applicable for food, beverage, cosmetic, pharmacy, plastic pipes, furniture, building materials, LED LIGHT, electronics, etc. various kinds of industries for placing high contrast

permanent codes enabling production lifetime track marking messages include series number, manufacturing date, expiry, batch, logo, characters, 2D code , bar code , etc., other messages,

Description	Laser Marking machine
Model	MH UV-50IN
Laser source power	5W
Laser source Brand	INNO
Laser source model	FIT-5W
Laser wavelength	355nm
Lens field	110*110mm
Laser source type	UV laser source
Lens focal length	F=160mm
Power supply	220-250V, 50-60HZ , 800W
Power supply brand	Taiwan Meanwell
Marking speed	Depends on the production line
Galvo head	ZBTK Double red focus
Marking speed	Depends on the actual production line
Marking materials	Transparent PVC ,
Focal length focus	Double red focus
Operation language	English , Vietnamese , Chinese
Working for materials	Plastic , glass , some kind of coated paper , plastic bags , plastic caps , plastic bottles , plastic pipes
Machine size	80*69*147cm
Machine net weight	80KG
